

A stylized illustration of a pile of papers and documents, rendered in light gray with black outlines, symbolizing a collection of information or data. The papers are layered and slightly curved, giving a sense of depth and movement.

The figure consists of four vertically stacked bar charts, each representing a different country. The x-axis for all charts is labeled 'Number of children' with categories: 0, 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20. The y-axis represents the percentage of families, with a scale from 0 to 100 in increments of 20.

- Canada:** The distribution is skewed to the right. The highest percentage is for 2 children (approximately 35%). Other notable peaks are at 0 children (approximately 25%) and 14 children (approximately 20%).
- France:** The distribution is more spread out. The highest percentage is for 12 children (approximately 30%). There are also significant percentages for 0 children (approximately 15%) and 18 children (approximately 25%).
- Germany:** The distribution is highly concentrated at the lower end. The highest percentage is for 0 children (approximately 45%). There is also a notable peak at 2 children (approximately 40%).
- United States:** The distribution is skewed to the left. The highest percentage is for 0 children (approximately 40%). There is also a notable peak at 1 child (approximately 25%).

The image contains two stylized bar charts. The top chart is orange and has a thick, irregular border. It contains two rows of blue bars. The top row has eight bars of equal height. The bottom row is split into two sections by a vertical line; the left section has eight bars of varying heights, and the right section has eight bars of varying heights. The bottom chart is pink and also has a thick, irregular border. It contains two rows of blue bars. The top row has three bars of different heights. The bottom row is split into two sections by a vertical line; the left section has three bars of different heights, and the right section has eight bars of different heights.
